BMP EOC #14

TITLE: BATTERY RECYCLING

Regulatory Citation: 6 NYCRR Part 374-3

Applicability: All batteries

Purpose: Ensure the proper collection, storage and recycling of spent all batteries

Department Responsible: Program Coordinators, Associate Coordinator of Business Services

Schedule: As needed.

Procedures: All staff will save work related used batteries for pick up by maintenance or custodial staff for recycling.

Used small batteries will be collected and placed in the container labeled "Universal waste – batteries." The container will be noted with the accumulation start date when the first battery is added. The container will be kept closed except when adding batteries.

Lead containing batteries can be transported to the approved local scrap dealer for recycling. A receipt will be obtained and kept by the Associate Coordinator of Business Services.

Other types of batteries in containers will be transported to the campus recycling waste storage area in the Campus Center building for recycling with fluorescent bulbs and batteries, as per the Physical Plant Maintenance BMPs.

Record keeping: Battery shipping record

Record Location: EHS- EPA files

Current vendor: Onyx Environmental
